## PRESS RELEASE

Monday, April 27, 2026

### City of Hutchinson Prepares for 2026 Mosquito Season

The City of Hutchinson will again be implementing its mosquito population reduction efforts this year. The goal of the program is to reduce the number of nuisance mosquitoes. Along with being a nuisance, some mosquitoes can be transmitters of several serious diseases.

The company chosen to help maintain the mosquito control program is Clarke Mosquito Control, Clearwater, MN. They encourage any residents who may have questions to call them toll free at (800) 240-4262. More information can also be found on the City of Hutchinson website [www.hutchinsonmn.gov](http://www.hutchinsonmn.gov).

#### **Sign up for the Everbridge notification system!**

All dates are subject to change without notice.

Larval Control – April 28-May 4

Trap Set Up – Week of May 11

The focus of the adulticide program will again be to minimize active adult mosquitoes. As trucks move about the neighborhoods using ultra-low volume sprayers mounted in the back, a light visible fog will move through the area. The fog will not cause visibility problems. Common sense precautions should be taken, including keeping away from the spray vehicles and out of the fog cloud. The majority of the spraying will be done from dusk to midnight or early morning before dawn. Trucks are equipped with GPS tracking devices and variable flow equipment allowing them to drive around 2 to 25 mph keeping the correct dosage.

The following dates are proposed for treatments, weather permitting.

Treatments may be extended if deemed necessary by City Officials.

#### **City Wide ULV Truck Scheduled Treatments**

Wednesday nights . . . May 20, 27; June 3, 10, 17, 24; July 1, 8, 15, 22

Possible additional Wednesday nights . . . July 29; August 5, 12, 19

**Reminders and updates will be posted on the Everbridge Notification System and on local media sites.**
